Chandigarh, India

PROFESSIONAL SUMMARY

Experienced Digital Solutions Engineer with a strong foundation in electrical engineering and 17 years of progressive responsibility. Expertise in PLC Programming (Siemens S7/Allen Bradley), ETAP Software, AutoCAD Electrical. Committed to delivering safe, reliable and sustainable energy solutions.

CORE COMPETENCIES

• PLC Programming (Siemens S7/Allen Bradley)	• ETAP Software	• AutoCAD Electrical
• Commissioning & Testing	• Harmonic Analysis	• Substation Design (132kV/400kV)
• DCS Configuration	• PSS/E Simulation	• Smart Metering
• DERMS	• Tableau	• SQL Database
• Digital Twin Modeling	• Cloud Platforms (AWS/Azure)	• Artificial Intelligence
• R Programming		

PROFESSIONAL EXPERIENCE

Chief Digital Solutions Engineer
2019 – Present

CESC Limited

- Enterprise SCADA Upgrade — Migration from legacy to modern SCADA/DCS platform across 20 generation units
- Demand Response Program — Implementation across 7 industrial consumers achieving peak demand reduction of 9 MW
- 132kV Transmission Line (9 km) — Tower design, foundation engineering, stringing and commissioning for interstate grid connectivity
- ESG Baseline Assessment — Carbon footprint quantification and net zero roadmap for 17 MW generation portfolio

SCADA Engineer
2017 – 2019

JSPL Power

- 400kV GIS Substation at Chandigarh — Design, procurement and commissioning of 6×315 MVA auto-transformers with numerical protection
- 100 MW Wind Energy Project — Turbine foundation design, inter-array cabling, substation and SCADA implementation

Power Systems Data Analyst
2012 – 2017

Kalpataru Power

- Demand Response Program — Implementation across 12 industrial consumers achieving peak demand reduction of 4 MW
- OT Cybersecurity Hardening — ICS security assessment and remediation across 17 substations per IEC 62351 standards
- Substation Automation — IEC 61850 based protection and control implementation at 13 EHV substations
- Delivered EPC project 11% under budget saving ■13 Cr

IoT Engineer
2011 – 2012

JSPL Power

- Green Hydrogen Pilot — 20 MW electrolyzer feasibility study and FEED for renewable hydrogen production
- Digital Twin Implementation — Real-time digital twin of 9 MW thermal plant for predictive maintenance and optimization
- Renewable Integration Study — Grid impact assessment for 6 MW solar/wind addition including dynamic stability analysis
- Smart Metering Rollout — Installation and commissioning of 13+ smart meters with AMI integration and MDM platform

- Achieved forced outage rate of 9% against industry benchmark of 12%

EDUCATION

M.Tech (Power Systems Engineering) 2007
PES University

CERTIFICATIONS & TRAINING

✓ PMP (Project Management Professional)
✓ ETAP Certified User
✓ GE Grid Solutions Certified
