Visakhapatnam, India

PROFESSIONAL SUMMARY

Results-driven Grid Stability Analyst with 12+ years of experience in India's power sector. Proven track record in Single Line Diagram and PLC Programming (Siemens S7/Allen Bradley). Delivered complex projects across generation, transmission and distribution segments.

CORE COMPETENCIES

• Transformer Engineering	• Single Line Diagram	• DCS Configuration
• Protection Relay Coordination	• Busbar Design	• PLC Programming (Siemens S7/Allen Bradley)
• Energy Audit	• IED Configuration	• Grid Modernization Projects
• Frequency Regulation	• Grid Code Compliance	• Energy Trading
• SVC/STATCOM Design	• Predictive Maintenance	• Machine Learning

PROFESSIONAL EXPERIENCE

Principal Grid Modernization Engineer

2019 – Present

Kalpataru Power

- Smart Metering Rollout — Installation and commissioning of 7+ smart meters with AMI integration and MDM platform
- Substation Automation — IEC 61850 based protection and control implementation at 9 EHV substations
- Smart Metering Rollout — Installation and commissioning of 3+ smart meters with AMI integration and MDM platform
- Power Quality Improvement — Harmonic filter design and installation at Visakhapatnam reducing THD from 12% to 3.5%

Grid Stability Analyst

2015 – 2019

Sterlite Power

- Enterprise SCADA Upgrade — Migration from legacy to modern SCADA/DCS platform across 10 generation units
- Substation Automation — IEC 61850 based protection and control implementation at 19 EHV substations
- OT Cybersecurity Hardening — ICS security assessment and remediation across 20 substations per IEC 62351 standards
- Saved ₹18 Cr annually through energy audit recommendations

Power Systems Engineer

2012 – 2015

Torrent Power

- OT Cybersecurity Hardening — ICS security assessment and remediation across 4 substations per IEC 62351 standards
- Grid Stability Enhancement — FACTS device (SVC ±18 MVAR) installation improving voltage profile across 6 substations
- 100 MW Wind Energy Project — Turbine foundation design, inter-array cabling, substation and SCADA implementation
- Digital Twin Implementation — Real-time digital twin of 5 MW thermal plant for predictive maintenance and optimization
- Led team of 10+ engineers across 10 project locations

EDUCATION

M.Tech (Power Systems Engineering)

2011

VIT Vellore

CERTIFICATIONS & TRAINING

-
- ✓ Python for Data Science (NPTEL)
 - ✓ Machine Learning Certification (Coursera)
 - ✓ ISO 9001:2015 Lead Auditor
