Visakhapatnam, India

## PROFESSIONAL SUMMARY

Dedicated power sector professional with 14 years of hands-on experience specializing in Short Circuit Analysis and HV/LV/MV Systems. Passionate about India's energy transition and digital transformation of the power sector.

## CORE COMPETENCIES

|                           |                              |                         |
|---------------------------|------------------------------|-------------------------|
| • Relay Testing           | • Short Circuit Analysis     | • Grid Operation        |
| • HV/LV/MV Systems        | • Energy Audit               | • Single Line Diagram   |
| • HMI Development         | • Metering & Instrumentation | • Solar PV Design       |
| • Utility Scale Solar     | • Microgrid Design           | • Hybrid Energy Systems |
| • Electrolysis Technology | • Solar Irradiation Analysis | • IoT Integration       |
| • R Programming           |                              |                         |

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                |
